

Vision for ICA Foundation

- The Foundation's commitments for LNG IUS donation will match our annual supply, and past surpluses.
- The Foundation will have a functional and efficient Board, whose membership will include representatives of major service delivery and training organizations.
- The Foundation will build a strategy to engage current partners and new partners and sustain ones, supporting the continuity of care for women in developing countries.
- Support materials, national experiences and lessons learned will be available to the public on our website, will be referred to in Board decisions, and be available to organizations seeking and receiving donations.
- The Foundation will have an explicit plan for the Foundation's support and functionality, as well as transition in Chairs and Board members of the Foundation.
- The Foundation will generate and/or accumulate evidence of the value of the Foundation's approach to ensuring a public benefit from new contraceptive technology to poor and vulnerable populations in developing countries.
- The Foundation will actively examine the issues of costs benefits of LNG IUS use in the countries where donations are made.
